

Student Success

Strong Alignment of K-12 and College Curriculum is Critical to Student Success

The state universities of Michigan strongly endorse the Michigan Academic Standards, which include the alignment of rigorous standards in mathematics, English language arts, science, and social studies for grades K-12. The public universities supported the Michigan Department of Education’s refinement of these standards. Students’ academic preparedness for the rigors of college-level work is fundamental to their success in higher education. A strong high school curriculum aligned with college standards is integral to student success and should be available to all students.

Policy Actions:

- Promote state-led collaboration among all stakeholders along Michigan’s elementary, secondary, and postsecondary education continuum to ensure that academically rigorous standards are available to guide instruction for all K-12 students.
- Ensure that any changes to statewide student assessments are only done with the involvement and input of the state’s universities.
